

QCTrojan-Bench — QFT: benign circuit and tampered variants

Benign

7 qubits | depth = 13 | gates = 28

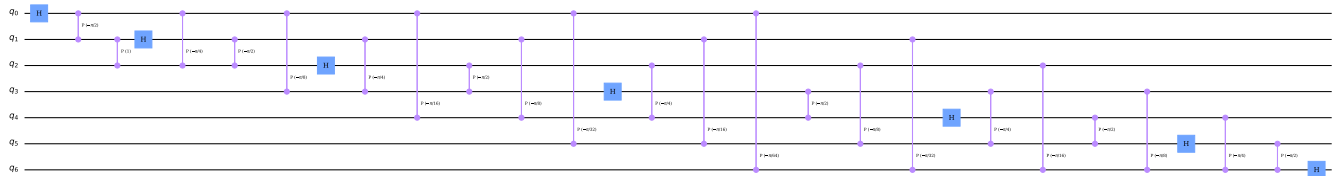

Static tampered

7 qubits | depth = 16 | gates = 31

CX-RZ(0.50)-CX on qubits [0, 5]

Triggered tampered

7 qubits | depth = 14 | gates = 29

MCPPhaseGate(1.00) controlled by qubit 1, target qubit 2. Dormant when control is $|0\rangle$.
